No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

CURRENT APPLICATION DATA:

CURRENT APPLICATION DATA:

PAPPLICATION NUMBER: US/09/125,642C

FILING DATE: 20-Aug-1998

PRIOR APPLICATION NUMBER: PCT/RP97/00729,

FILING DATE: 17-Feb-97

INFORMATION FOR SEQ ID NO: 15:

SEQUENCE CHARACTERISTICS:

LENGTH: 132 amino acids

TYPE: amino acids

STRANDENNESS: single
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö

Patent No. 5645994

GENERAL INFORMATION:
APPLICANT: Huang Ph.D, Wai Mun
TITLE OF INVENTION: Method and Compositions for
TITLE OF INVENTION: Identification of Species in a Sample
NUMBER OF SEQUENCES: 207
CORRESPONDENCE ADDRESSS:
ADDRESSSE: Trask, Britt and Rossa
STREET: P.O. Box 2550
CITY: Salt Lake City

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
